“P76/Marina: Service Documents”

by Tony Cripps¹

Listed below is a description of the factory service documents which apply for the Leyland P76 and Marina range in Australia.

Drawing Office Instruction (DOI): Short document of a technical nature often containing modifications to parts and fitting instructions.

Service Bulletin (SB): Issued to Dealer service managers for use in their service departments. Usually describes a major change, or solution to an in-service problem. Not for viewing by customers.

Service Liaison Summary (SLS): Advanced developments at the factory. Most of these subsequently formed the basis of a Service Bulletin. Issued to Factory Service Engineers and not for distribution or viewing by Dealers.

A copy of each article can be purchased from the Resources page of the web site www.leylandaustralia.com.au
